

Slim screen 3D displaying

Full-angle 3D displaying

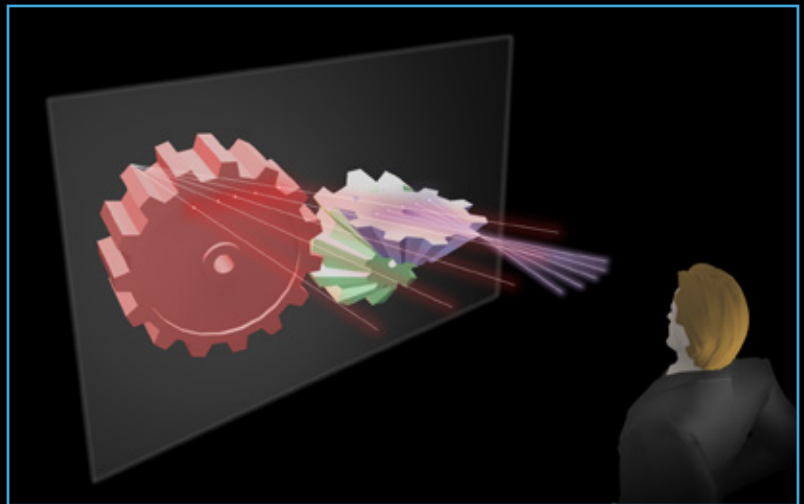

Large scale 3D displaying

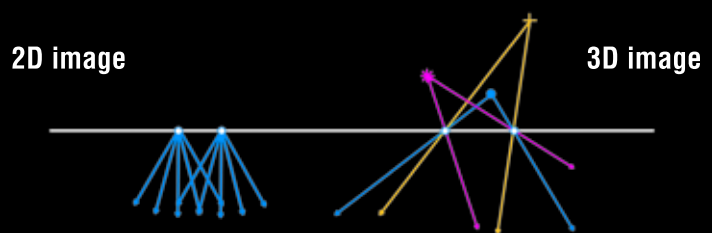

3D display for promotion

See your 3D data "as is"

The holographic 3D display system developed by Holografika overcomes the limitations of the current 3D displays, reconstructing natural 3D images to a number of viewers in a reasonable field of view, with walk-around possibility without any restrictions.

The 3D Light Field technology is a high-end approach compared to other solutions and fulfills all the requirements of real 3D displaying simultaneously
