

## **HOLOVIZIO returns to Dubai for GITEX 2009, 18-22 October, 2009**

Following the spectacular, built-in true 3D displaying presentation last year at GITEX 2008 attracting many show visitors to the Hungarian booth, Holografika decided to return to Dubai with its latest, stand-alone, glassless, interactive 3D displaying system, dedicated primarily for the promotional, event rental and digital signage markets.

This time, beside showcasing stunning 3D images, computer generated and camera recorded 3D videos, Holografika will introduce its camera-based 3D model viewer, ready for the visitors to interact with the 3D objects, models using their hands only.

„We get a growing number of inquiries to be present in the Emirates’ in the prestigious estates, hotels, new buildings, shopping malls and we are ready to come here to establish business partnership and presence with our high-end 3D solutions in this very important region for us” –said Tibor Balogh, CEO and Founder of Holografika.

Come and visit us at Hall 2, G2-30 on GITEX 2009

About Holografika:

**Holografika** is a fast growing technology company, awarded Red Herring Top 100 Europe and WEF Technology Pioneer. The company develops proprietary holographic technologies and HoloVizio 3D displays, which can serve as a basis for future 3D television.

Holografika offers a high-end solution for the glassless, true 3D visualization of three-dimensional CG and camera-recorded images. Its patented holographic technology called HoloVizio provides a natural 3D view that outperforms many other existing 3D visualisation solutions. The company's current product line includes monitor-type 3D displays for professional markets such as medical, CAD, security, 3D phone platform and gaming industries. The company has also developed a leading edge, collaborative large-scale 72" 3D displaying system for applications in oil gas exploration, telepresence, simulation, entertainment e.g. like theme parks, glassless 3D cinema and a 45" display for promotion, event rental and digital signage.
